

Stop Inserting Metadata Manually Now with Etere MAM

Now Etere users can instantly make their media library smarter, richer, and easier to explore, all thanks to our new integration with The Movie Database (TMDB). With just a few clicks, your films and TV shows can come alive with posters, backdrops, cast info, ratings, and more automatically. No tedious data entry, no juggling multiple sources—just everything you need, ready when you need it.

Etere logo

You can pull in all the key details for any asset: titles, original titles, release dates, genres, overviews, taglines, runtime, and status. Visuals are updated too, with posters, backdrops, and logos that make your library look great at a glance. Cast and crew information is included, so you can explore talent connections and discover new ways to organise your content.

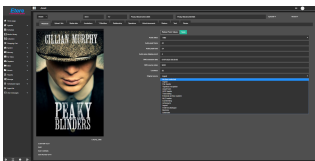

TMDB's community-driven ratings, popularity scores, and vote counts help you see what's trending, while budget and revenue data give insight into how your content is performing. Best of all, everything updates automatically through Etere workflows, so your library stays fresh without lifting a finger.

With TMDB in Etere MAM, you can stop wrestling with spreadsheets and start focusing on what matters: Exploring, discovering, and enjoying your media library like never before.

For a media management strategy that works for your business, contact us for a consultation with our product specialists.

About The Movie Database (TMDB)

The Movie Database (TMDB) is a community built movie and TV database. Every piece of data has been added by our amazing community dating back to 2008. TMDB's strong international focus and breadth of data is largely unmatched and something we're incredibly proud of. Put simply, we live and breathe community and that's precisely what makes us different. www.themoviedb.org
