

LOGGING

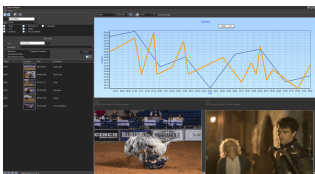

Etere provides users with a comprehensive suite of software tools, enabling seamless audience data analysis, precise logo and timecode insertion, efficient recording management, and meticulous compliance logging. Designed for regulatory adherence and optimized content delivery, Etere ensures smooth distribution across OTT, VOD, and social media platforms.

Memory Browser

Logging

etere memory

Etere manages the end-to-end media lifecycle of broadcast and media enterprises. Under the reliable framework of the Etere Ecosystem, streamline your entire workflow with Etere solutions that feature seamless integration and useful operability. As the world's first producer of software-only broadcasting solutions, Etere Solutions will declutter your control rooms, increase productivity, and encourage a better range of adaptability and scalability. Take the first step to achieving the results-driven success that you want. We can help you attain results that are tailored to your success.

Broadcasters must ensure their aired content is logged and available online to comply with regulatory requirements and export content easily. With Etere, users can record any and all content broadcasted from multiple mediums and platforms, archive it, and enable simultaneous users to monitor the live or archived content.

Etere Memory

Etere Memory offers broadcasters a dependable compliance logger that efficiently records and stores transmitted video and audio in a low-resolution format (MPEG-4/WMV). Designed to help operators meet all broadcast recording regulations, it ensures seamless legal compliance. Additionally, it empowers content creators to repurpose their material with ease, providing a cost-effective solution for maximizing content value.

EPG/As Run log integration

Seamless integration with any EPG or As Run Log from automation systems offers powerful tools for efficiently searching and retrieving specific content. These files can be automatically imported, manually uploaded, or sourced from the Internet, ensuring flexible access. Users can play or clip relevant content directly from the EPG or As Run Log, streamlining workflows. Additionally, the automatic import of common as-run logs simplifies content discovery for ad verification and compliance, enhancing operational efficiency.

Closed caption/SCTE/DVB-Subtitles/Teletext/Multiple audio tracks

Broadcasters are required to meticulously record and monitor DVB subtitles, closed captions, and Teletext to ensure regulatory compliance and maintain high service quality standards. These measures play a crucial role in preserving accessibility, accuracy, and reliability in television broadcasts.

Key Features

- HTML5 player for web/desktop browsing and H264 (MPEG-4) compatibility
- Compliance logger that complies with all the TV regulatory requirements, such as the FCC, in one platform
- Streaming out of content for remote control of video
- Live clipping for OTT and social media
- Video-on-demand (VOD) clipping
- HTTP, UDP, RTSP & RTMP streaming to the flash media server and Wowza Media Server
- Supports analogue and digital video capture boards
- Data protection and advanced redundancy to record files on remote servers
- Unlimited and simultaneous clients/recordings, multiple viewings and editing
- Embedded time code on recorded videos
- Automatic detection and SNMP notifications for black and frozen video issues
- Metadata marking to identify and search key video parts
- Audience data insertion into logged video files and competitors' record checks
- Supports insertion of logos and timecodes, supports annotation on video
- Includes Etere HSM archiving at no additional costs
- Integration with loudness check and preview with Etere Audience
- Works from different devices: PC, MAC, iPads, smartphones
- Web-based broadcast logger – no client installation is needed; access from anywhere

About Etere

Since its beginnings in 1987, Etere has been preparing users to be ready for the future. Etere is a worldwide provider of broadcast and media software solutions backed by its mark of excellence in system design, flexibility and reliability.
