

ETERE VISUAL RADIO AUTOMATION

Maximize your control over live streams and visual radio experiences with the robust and dynamic Visual Radio automation feature.

Etere logo

radio live

Expand your reach to a broader audience utilizing the comprehensive array of live streaming and editing tools available in the Radio Live Visual Radio suite.

Powerful Automation

Seamlessly integrated with radio automation capabilities, the Visual Radio suite ensures a smooth transition, eliminating the need for users to integrate a separate system.

Voice Controlled Camera Switching

Experience seamless camera switching with the innovative Voice-Controlled Camera Switching feature. Eliminate the necessity of a camera operator as the system intelligently switches to the active speaker automatically. Tailor your experience by crafting custom rules to showcase both camera feeds simultaneously and add a personalized graphical overlay to frame each shot precisely to your liking.

Custom Visual Graphics

Create or import professional graphic overlays and assets, display social media updates, and apply endless visual effects and transitions. The easy drag-and-drop feature allows users to add and delete graphics without hassle.
