

ETERE RADIO LIVE MUSIC MANAGER

Etere presents the world's most reliable music scheduling software. Create perfect music rotations, automatic playlists, and prepare detailed logs to take charge of your radio station.

Radio live

radio live

The Etere Music Scheduling is a powerful and scalable music scheduling tool that ensures diverse music rotations for any number of radio stations. The intelligent software is equipped with an intuitive scheduling technology and an easy to use interface that simplifies the scheduling process for users. The smart software leaves no unscheduled positions and always chooses the best music for each position.

Intuitive Software

The smart software is fully controlled via perimeters set by the user, and will choose songs accordingly. The system is sure not to pick the same song for multiple stations, ensuring variety in music. The Etere Music Scheduler is able to alter music patterns depending on the audience response, modifying your playlists to the best experience for listeners. The easy to use software is able to be adjusted using the station specific attributes that can control specific airplay on one station.

Scalable

One music library is able to connect to multiple stations, and managed through the Etere Music Scheduling interface. The configurable architecture is able to support hundreds of stations or channels. Users can connect to the shared database from anywhere with an internet connection, and is able to easily share media and resources.

Integrated

The Etere Music Scheduling is fully integrated with Radio Live and is able to create, link, and manage multiple stations.
